

Birmingham: Hunters Moor

Neurological Rehabilitation Centre

Hunters Moor provides specialist neurorehabilitation, including neurobehavioural and spinal injury rehabilitation in Birmingham.

Hunters Moor is a Headway accredited post-acute specialist service with 38 en-suite rooms across three units. Our purpose built home has large gardens and is conveniently located in Hall Green with easy access to shops, public transport and motorways.

Our multi-disciplinary team includes Consultant Medics, Physiotherapists, Speech and Language Therapists, Occupational Therapists, a Clinical Psychologist, Nurses, Therapy Technicians and Rehabilitation Assistants who provide assessment, intervention and care.

We have expertise in caring for those who are in prolonged disorders of consciousness, post stroke or following traumatic or acquired brain injury. Complex nursing needs such as diabetes, epilepsy, open wounds, stoma care, tracheotomy and feeding tubes can also be supported.

Longer-term support and end of life care can be provided for those individuals with progressive neurological conditions such as Huntington's disease, multiple sclerosis, motor neurone disease, Parkinson's disease, alcohol related brain disease and dementia.

The Janet Barnes unit is 12 bedded and accommodates those with complex physical rehabilitation needs.

The Community Reintegration Unit has 16 bedrooms and empowers service users to be as independent as possible as they progress with their recovery.

The Olive Carter Unit is a low stimulation environment with 10 bedrooms, specialising in neurobehavioural rehabilitation for those with behaviours that challenge. We can care and support those detained under the Mental Health Act.
