

Northampton:

- Christchurch View
- Lloyd House
- Abington View

Lloyd House, Christchurch View and Abington View offer neurorehabilitation in a local community setting.

Recently rated Good in all indicators under the CQC's new inspection regime, with all units being an Headway Approved Provider.

Christchurch View and Lloyd House offer en-suite bedrooms which are modified for people who use larger tilt and space wheelchairs, or need hoists for transfers. In addition to en-suite bedrooms, there are also flats, bedsits and a four-bed transitional living unit, so residents are able to move through the centres as they become more independent. Abington View is a four-bed community house which provides supported living for female residents. Christchurch Group's Northampton services can offer neurorehabilitation for up to 40 residents.

The three centres are supported by an interdisciplinary team of rehabilitation medicine consultants, neurologists, a neuropsychiatrist, neuropsychologists, physiotherapists, speech and language therapists and occupational therapists.

Located in Abington, the centres are close to local shops, the park and amenities, so residents benefit from social, occupational and educational opportunities in an ideal setting for specialist community-based transitional rehabilitation.
