care
group

Our highly trained teams work with individuals around rehabilitation and enablement, supporting everyone to develop skills and gain independence in a way that suits them.

Service users have access to an on-site occupational therapist and we use the Positive Behaviour Support framework to support individuals who demonstrate behaviours of concern and to improve quality of life.

The house includes 4 bed-sits with en-suite bathroom and kitchenette facilities and one bedroom with en-suite bathroom.

There are several large communal areas and an accessible garden. Located within a thriving market town with excellent transport links, people are encouraged to access the wider opportunities both in and around their home.

Services we offer

- Neurorehabilitation
- Neurobehavioural rehabilitation
